FROM

THE SURGEON-GENERAL WITH THE,
GOVERNMENT OF BOMBAY;

TO

THE CHIEF SECRETARY TO GOVERNMENT,
General Department,
Bombay.

Bombay, 10th April 1895.

SIR,

I have the honour to submit, for the information of Government, the annual Administration Report on the Lunatic Asylums for 1894.

2. The usual repairs have been made to the buildings during the year.

3. At Colába no new works have been carried out, but the usual repairs were made by the Public Works Department at a cost of Rs. 4,513-15-0. On the 11th of February of the current year His Excellency Lord Harris laid the foundation stone of the new asylum at Naupada near Thána which is to replace the Colába Asylum.

4. At Poona one of the male wards was re-roofed and fitted with ridge ventilators, and the floor of the back verandah of this ward raised 15 inches so as to bring it to the same level as that of the ward. The central building adjoining the office and previously unused was, during the year, converted, at a cost of Rs. 481, into a ward for 21 non-criminal lunatics, raising the accommodation of the asylum from 106 to 127.

The great wants of the asylum are :—

(a) Accommodation for criminal lunatics. This will necessitate taking up of additional ground which is available in the neighbourhood.

(b) Work or shelter sheds for use during the day.

(c) Enlarged kitchen accommodation.

(d) Land for agricultural purposes, &c.

5. At Dhárwár the capacity of the asylum has been increased from 32 to 65 by the addition of new night barracks sanctioned in Government Resolution No. C. W.—2009 of 2nd December 1893. They were finished and handed over in July last. The floors of the night wards are paved with patent stone. Government have in Resolution No. 234 C. W.—1294 of 14th August last, Public Works Department, sanctioned the re-arrangement of the buildings, so as to separate more effectually the male and female inmates. This is a very necessary and even urgent work, and is estimated to cost Rs. 1,500—1,600. Quarters for the warders and servants have also been approved and will be completed when funds are available. A small latrine was built from my discretionary grant for the Hospital Assistant's quarters.

6. At Ahmedabad the ventilation of one of the latrines for male insanes was improved and iron bars were fixed in the windows of the cells occupied by criminal lunatics to ensure security.

7. At Ratnágiri two additional cells in the criminal part of the asylum and alterations in the cook-rooms have been sanctioned, which works, it is hoped, will soon be taken in hand, as they are very much required.

8. The water-supply for domestic purposes has been good and abundant throughout the year, though insufficient for gardening. The Municipality at Ratnágiri has not yet supplied the quantity sanctioned by Government, and in Government Resolution No. 2197, dated 11th June 1894, the Commissioner, S. D., was asked to report on the subject. It would be of advantage if this long-standing complaint against this Municipality could be removed.

9. The grants for the amusement of the lunatics have been judiciously expended by the Superintendents on music, newspapers, sweetmeats and other indulgences, which from the reports of the different Superintendents seem to have been much appreciated by the patients.

10. During the year under report the following amounts were sanctioned and spent from my discretionary grant for the undermentioned minor works at Lunatic Asylums :—

(1) Rs. 24 for providing an iron-barred ventilator to the latrine of the Asylum at Ahmedabad.

(2) Rs. 35 for a latrine of the district pattern for the Hospital Assistant's quarters at the Asylum, Dhárwár.

(3) Rs. 132 for fixing ridge ventilators to the roof of one of the male wards at the Poona Asylum.

(4) Rs. 44 for raising the floor of the back verandah to the level of the floor of one of the male wards in the Poona Asylum.

11. On the statements appended at the end of the report I beg to make the following comments.

12. Statement No. I giving the admissions, discharges, &c., of the lunatics in the asylums shows that the total population during the year under report was 1,000 as compared with 988 in the previous year. Of these, 808 were males and 192 females, as compared with 800 and 188 respectively, in 1893. On 1st January 1894 there remained 585 males and 148 females, 203 males and 41 females were admitted, and 20 males and 3 females re-admitted. The number discharged was 192—163 males and 29 females. Of these, 66 males and 15 females were reported cured, 93 males and 13 females transferred to friends (79 males and 6 females improved and 14 males and 7 females not improved), and 4 males and 1 female were discharged otherwise. 79 males and 22 females died against 62 males and 15 females in 1893, leaving at the end of the year 566 males and 141 females—total 707 as compared with 733 in the previous year. The daily average strength was 583·1 males and 144·4 females—total 727·5 against 716·1 in the preceding year.

The percentages of cures and deaths to the daily average strength were :—

Cured	...	{	Males ...	...	...	11·3	} Total ...11·1
			Females...	...	...	10·4	
Died	...	{	Males ...	...	...	13·5	} Total ...13·9
			Females...	...	...	15·2	

The percentages to admissions were :—

Cured	...	{	Males ...	...	...	29·6	} Total ...30·3
			Females...	...	...	34·1	
Died	...	{	Males ...	...	...	35·4	} Total ...37·8
			Females...	...	...	50·0	

Statement No. II is a return of criminal lunatics. On the 1st January 1894 there remained 103 males and 10 females, 14 males and 2 females were admitted and 1 male was re-admitted, making a total of 118 males and 12 females, giving a total of 130 in all confined, or 3 less than in the previous year. Of these, 14 males and 2 females were discharged, transferred, &c., 13 males died, and 91 males and 10 females remained at the end of the year. The daily average strength of this class of insanes was 97·7 males and 9·4 females—total 107·1 as compared with 106·5 in 1893.

Particulars of the different kinds of these insanes are shown in the following table as ordered by the Government of India :—

Kind of Criminal Lunatics,	Colába.	Ratnágiri.	Poona.	Dhárwár.	Ahmedabad	Hyderabad.	Total.
Those tried and acquitted on the ground of insanity ...	14	9	...	1	4	2	30
Those insane on admission and found to be incapable of making a defence ...	41	17	...	2	8	11	79
Those who became insane during imprisonment ...	8	1	1	3	3	5	21
Total ...	63	27	1	6	15	18	130

Statement No. III is a return showing the religion, sex, and residence of the patients admitted during the year. Of the 267 admissions and re-admissions 48 were Christians (Europeans 43, Eurasians 2 and Native Christians 3), 118 Hindoos, 71 Mahomedans, and 30 of other castes. As usual, the majority of Europeans admitted were soldiers coming from various parts of India.

Statement No. IV shows the occupation of the patients admitted. Beggars and mendicants form the majority, *viz.* 33, soldiers numbered 30, cultivators and labourers 29, merchants and traders 21, clerks 12, sepoys and peons 11, domestic servants 8, and students and mechanics 7 each. 25 patients had no occupation, and in 48 cases the occupation was not ascertained.

Statement No. V gives the ages of the lunatics admitted according to sex. Under 20 there were 18 males and 2 females, between 20 and 40 there were 169 males and 31 females, between 40 and 60 years of age 34 males and 9 females, and above 60 years 2 males and 2 females.

Statement No. VI shows the various types of insanity, and the following table gives the number remaining, admitted, recovered, improved and died in each form of insanity :—

	Remaining.	Admitted.	Total.	Recovered.	Improved.	Died.
Mania ...	292	129	421	41	33	42
Melancholia ...	86	52	138	16	22	17
Dementia ...	135	32	167	4	13	21
Idiocy ...	34	8	42	...	...	7
Epileptic insanity ...	26	10	36	1	2	3
Charas smoking ...	5	3	8	...	...	2
Ganja smoking ...	84	13	97	12	5	4
Use of bháng ...	26	2	28	1	2	2
Opium smoking ...	...	1	1	...	...	...
Opium eating ...	5	...	5	1	...	...
Spirit drinking ...	27	10	37	4	7	1
Other types ...	13	7	20	1	1	2
Total ...	733	267	1,000	81	85	101

Statement No. VII gives the alleged causes of insanity among the lunatics. Of the 1,000 cases a cause is given in 487 and is unknown in 513. Physical causes numbered 409 and moral 78. Among the former the use of intoxicating drugs and abuse of spirits are credited with 176 cases, hereditary causes accounted for 40, epilepsy and previous attacks 37 each, fever 30, destitution and congenital disease 21 each, masturbation 12, injury to head 10, sunstroke 6, child birth 5, syphilis and climate 4 each, sexual excess 2, and concussion of brain, uterine disease, old age and paralysis 1 each. Of moral causes, grief is the alleged cause in 48 cases, religion in 9, anger in 7, fear in 4, anxiety and study in 3 each, and jealousy and loss of money in 2 each. Among criminal insanies, charged with crimes of violence, the following are the alleged causes of insanity :—

Ganja smoking ...	8	Injury to head ...	1
Opium eating ...	2	Hereditary ...	3
Charas smoking ...	1	Congenital ...	1
Spirit drinking ...	2	Grief ...	4
Fever ...	3	Religion ...	1
Peurperal fever ...	1	Anxiety ...	1
Epilepsy ...	5	Anger ...	1

In 36 such cases the cause is not known.

Statement No. VIII is a return of the sick in the asylum hospitals (for diseases other than insanity) with the results. At the beginning of the year there remained 42 patients under treatment and 443 were admitted during the year, making a total of 485 against 350 in 1893. Of these, 330 were cured, 13

discharged otherwise (11 transferred to friends and in 2 cases the diseases were changed), 101 died, and there remained 41 patients under treatment at the close of the year. The daily average sick was 48·4 as compared with 67·4 in the preceding year. The chief causes of admissions were ague, dysentery, debility, epilepsy, diarrhoea, bronchitis, chronic pneumonic phthisis, abscess, paralysis, pneumonia, remittent fever, influenza, cholera and dropsy. Of the 101 deaths, 20 were due to dysentery, 13 to epilepsy, 11 to chronic pneumonic phthisis, 9 to pneumonia, 8 to cholera, 7 to paralysis, 6 to dropsy, 3 each to remittent fever, debility, old age, anæmia and diarrhoea, 2 to ague and 1 each to influenza, erysipelas, tubercle of lungs, disease of the heart, bronchitis, enteritis, peritonitis, Bright's disease, curvature of spine and asphyxia.

The following table gives the ratio of deaths per mille of the average daily strength and the total population of each of the asylums as compared with that of the preceding year:—

			Average daily strength.	Total population.	Number of deaths.	RATIO OF DEATHS PER MILLE TO	
						Average daily strength.	Total population.
Colába	1893 ...	...	285·5	452	44	154·1	97·3
	1894 ...	...	287·6	445	41	142·6	92·1
Ratnágiri	1893 ...	...	84·7	99	2	23·6	20·2
	1894 ...	...	96·6	108	5	51·8	46·3
Poona	1893 ...	...	96·0	138	13	135·4	94·2
	1894 ...	...	95·0	147	32	336·8	217·7
Dhárwár	1893 ...	...	36·0	43	...	...	...
	1894 ...	...	38·0	44	1	26·3	22·7
Ahmedabad	1893 ...	...	105·9	116	2	18·9	17·2
	1894 ...	...	105·3	120	5	47·5	41·7
Sir Cowasji Jehángir, Hyderabad.	1893 ...	...	108·0	140	16	148·1	114·3
	1894 ...	...	105·0	186	17	161·9	125·0
Total	1893 ...	...	716·1	988	77	107·5	77·9
	1894 ...	...	727·5	1,000	101	138·8	101·0

From the above it will be seen that excepting Colába the death-rate was higher in all the asylums. At Colába the total number of deaths was 41 (3 Europeans and 38 Natives), or 3 less than in the previous year. Among the Europeans there were 2 cases of chronic pneumonic phthisis and 1 of dropsy, making a death-rate of 36·6 per mille of the total population compared with 56·3 in the previous year. The 2 cases of phthisis had been long in the asylum under treatment suffering from chronic dementia and idiocy; both these cases had been under treatment in the hospital for some time with tubercular deposit in the lungs complicated with dysentery which rendered treatment of little avail. The case of dropsy occurred in a British soldier who had been suffering from oedematous condition of lower extremities and face prior to his admission into the asylum, the result apparently of cirrhosis of the kidneys and dilatation of the left cavities of the heart and other morbid conditions revealed at the post-mortem examination. The mortality among the Natives was at the rate of 104·7 per mille as compared with 105·0 in 1893 and due chiefly to dysentery, chronic pneumonic phthisis, paralysis, epilepsy, and dropsy. Eleven of these cases were pauper patients, sent in by the Police, and were found on admission much exhausted by privations and suffering from advanced stages of disease, chiefly from dysentery, pulmonary phthisis and paralysis. Others were old inmates

whose physical and mental state was reduced below *par*, and all such cases succumbed inevitably to the prevailing diseases.

At Ratnágiri there were 5 deaths as compared with 2 in the previous year, giving a ratio of 46·3 per mille of the total population against 20·2 in 1893. The causes were dysentery in 2 cases, and tubercle of lungs, anæmia and curvature of spine in 1 each. The health of these persons was bad and weakly on admission.

At Poona the number of deaths was considerably larger than usual, *viz.*, 32, as compared with 13 of the previous year, giving a ratio of 217·7 per mille of the total population against 94·2 in 1893. The mortality is chiefly attributable to the prevalence of cholera from 15th July to 14th August 1894 and to the debilitated condition of some of the lunatics from age, epilepsy and impaired health on admission. Of the 32 deaths, 8 were from cholera, 8 from epilepsy generally associated with debility, 3 each from dysentery and general debility, 2 each from diarrhœa, remittent fever and old age, and 1 each from general dropsy, Bright's disease, chronic bronchitis and paralysis. Nine cases of cholera occurred during the outbreak, and directly the disease manifested itself, the patients were transferred for treatment to the Sassoon General Hospital where 8 of them died; the length of time the fatal cases were under treatment varied from 7 hours to 2 days and 7 hours. Of the 8 cases of epilepsy only 1 was admitted to the asylum during the year, the oldest resident dated from 8th August 1891. They were all in an impaired state of health on admission and most of them were subject to frequent epileptic attacks during their residence. In one of these the disease was associated with diarrhœa of a persistent nature for about 2 months before death. Two of the patients who died of dysentery were returned as in fair health on admission, and the third in a weak and debilitated condition, suffering from dysentery associated with malarial fever when brought to the asylum on 12th September 1894. Of the 3 cases of debility one had been continuously on the sick list for 2 years and 1 month, the second for 7 months, and the third for over 4 months. The latter patient had been in the asylum for 9 years and was returned as only in fair health on admission. The first case of diarrhœa was in a weak and emaciated condition when admitted on 14th August 1893, and notwithstanding the greatest care remained so until death; the second was in a fair state of health when admitted in September 1893, but the digestive system being impaired, he never regained strength. Of the 2 cases of remittent fever 1 was in a weak and emaciated condition when sent to the asylum from Sholápur on 22nd August 1894 and was subject to slight recurrent attacks of ague which had considerably impaired his constitution before the remittent fever set in. The 2 cases reported as having died from old age were respectively admitted into the asylum on 6th September 1882 and 23rd September 1884. Both enjoyed fairly good health up to a year ago when their strength began to fail. The patient suffering from general debility was placed on the sick list on 15th March 1894, but for some time previously he had been complaining of weakness and slight swelling of feet and legs and disinclination to walk or work in the garden as he had previously willingly done. He became anæmic and the dropsy gradually increasing caused death from exhaustion on 6th August 1894. The patient with Bright's disease had been 14 years and 6 months in the asylum and enjoyed fairly good health until the latter part of December 1893 when symptoms of kidney disease developed and necessitated his being placed on the sick list on 2nd January 1894, where he remained until death, on 21st February 1894, from exhaustion. The case of bronchitis was sent to the asylum on the 21st April 1894 in an impaired state of health, suffering from fever and chronic bronchitis, and was placed on the sick list and remained under treatment until death on 5th August 1894. On admission into the asylum on 30th April 1894 the case of paralysis was in a bad state of health suffering from general paralysis and incontinence of urine. He gradually got weaker and died from exhaustion on 15th October 1894.

At Dhárwár there was only 1 death, giving a ratio of 22·7 per mille to the total population, ascribed to influenza which was locally epidemic in the early part of the year. Eleven of the lunatics (all male) were attacked and in one the attack proved fatal. The patient (a non-criminal) came into the

asylum in 1889 and was the subject of epileptic insanity. His temperature ran high and from the outset he had lung complications and cardiac failure. *Post-mortem* examination showed evidences of old pleuro-pneumonia as well as recent disease.

The Ahmedabad Asylum shows an increase of 3 deaths over the previous year. The mortality was due to anæmia 2 and to chronic diarrhœa, pneumonia and enteritis 1 each. The fatal case of enteritis occurred in a woman, the disease proving fatal in 7 hours, probably due to acute malarial poisoning. Of the 5 fatal cases, all with one exception were amongst inmates whose bodily health was much impaired before admission to the asylum. The ratio of deaths per mille of the total population was 41·7 compared with 17·2 in 1893, but the percentage of deaths to daily average strength during the previous five years was 6·0 and in the year under report 4·7.

At the Gowasji Jehángir Asylum, Hyderabad, the number of deaths was 17 against 16 in the previous year, and the ratio per mille of the total population was 125·0 compared with 114·3 in 1893. The causes of mortality were pneumonia 7, dysentery 3, ague followed by debility 2, and remittent fever, erysipelas, dropsy, epilepsy and asphyxia (strangulation suicidal) 1 each. The high death-rate was much influenced by the high inundation (as in the year 1892) of the river Indus. The asylum was for months surrounded by water and was unhealthy in consequence of the severity of the cold weather. Of the 17 fatal cases, 4 occurred during the months of January and February 1894 from pneumonia.

Statement No. IX is the cash account of the asylums during the year under review. In accordance with the orders of the Government of India conveyed in their Home Department (Medical) letter No. 480, dated the 13th August 1894, embodied in this Government Resolution No. 3405, dated 8th September 1894, General Department, the value of the asylum manufactures sold to the public has been shown under the head of "Miscellaneous Receipts," and the estimated value of labour of insanes as supplementary servants of the asylums omitted. The total income amounted to Rs. 1,37,477-10-10. Of this, Rs. 1,09,781-7-2 were received from the Treasury, Rs. 13,781-5-3 from paying patients, Rs. 11,014-4-11 were "book receipts" on account of Europe medicines, forms and stationery and work done by the Public Works Department, and Rs. 1,727-9-5 were miscellaneous receipts. The figures for the previous year were Rs. 1,07,257-9-1, Rs. 14,023-3-6, Rs. 8,218-6-6, and Rs. 1,763 respectively. The value of manufactured goods made over to asylums for asylum purposes was Rs. 1,173-0-1 as compared with Rs. 902-9-1 in 1893. The total expenditure was the same as the income. The establishment cost Rs. 46,594-14-6, showing an increase of Rs. 665-4-3, due to the increased rate of exchange compensation allowance to the Superintendent of the Colába Lunatic Asylum and to the additional establishment in the Dhárwár Asylum. Rs. 50,091-8-9 were expended on diets against Rs. 49,849-10-4 in 1893, the increase being attributable to the somewhat larger number of patients. Clothing and bedding cost Rs. 4,720-7-1, or Rs. 658-7-2 less than in the previous year. There is a decrease of Rs. 141-11-2 in the expenditure of medicines, while contingencies show an increase of Rs. 2,559-3-4 over the preceding year, due to the renewal of cooking pots, hardware, &c., as well as to the purchase of more books and periodicals for the Colába Asylum Library, from the discretionary grant.

The following is the abstract of cash account required by the Government of India:—

	Daily average strength in 1894.	ESTABLISHMENT.		DIST.		CLOTHING AND BEDDING.

If the amounts of Rs. 13,781-5-3 received from paying patients, Rs. 1,727-9-5 on account of the sale of manufactures and unserviceable articles, refund of batta, &c., and labour on trees, remitted into the Treasury, and Rs. 1,173-0-1, value of manufactures made over to asylums for asylum purposes, be deducted from the amounts received from the treasury and adjusted to Government as "book charges", the net cost to Government will be Rs. 1,04,113-13-4 and the net cost per head Rs. 143-1-9 as compared with Rs. 98,787-3-0 and Rs. 137-15-2 respectively, in 1893.

Statement No. X is a return of the sanctioned establishment as it stood on 31st December 1894. The monthly cost was Rs. 3,848-8-0 against Rs. 3,761-8-0 in the preceding year, the increase being due to the revision of the establishment of the Dhárwár Asylum, which necessitated the entertainment of a Hospital Assistant permanently and additional servants.

Statement No. XI shows the receipts and expenditure of the manufacturing department. The average number of insanes employed was 313.3, (males 254.6 and females 58.7), as compared with 304.4 in 1893. The total credits amounted Rs. 3,529-11-5 and debits to Rs. 2,271-1-11, showing a profit of Rs. 1,258-9-6.

In calculating the percentage of the number of inmates employed, no deduction has been made on account of Europeans, Eurasians, paying patients or sick. There is no suitable work for Europeans and Eurasians, while paying patients and the higher classes of natives are, as a rule, wholly averse to labour, to which before admission they have been unaccustomed.

With reference to paragraph 3 of the Government of India's letter above quoted, I beg to state that the results of the manufacturing operations must continue to compare unfavourably with those of other provinces so long as the facilities and circumstances remain as they are. In the Colába Asylum, for instance, space is so limited that agricultural operations are impossible and industries such as oil-pressing, dairy, farming, &c., from which large profits are said to be made elsewhere, cannot be profitably carried out. To put our asylums somewhat on a par with asylums in other parts of India, really good arable land in the vicinity of the asylum, with a good supply of water for agricultural pur-

poses, will be necessary, and plant and machinery of a good and modern description for manufacturing purposes will be required.

At Ahmedabad and Poona, and perhaps Hyderabad, the conditions are more favourable than elsewhere but land and machinery are required, and I am not sure that even if supplied the result would be commensurate with the outlay.

So far as I have been able to judge from a cursory inspection, I do not think the soil at Naupada will in any way compare with that of Bengal and the North-Western Provinces, and the results must always be unfavourable from an agricultural and financial point of view.

Statement No. XII gives the condition of the insanes as to caste, sex and marriage, and is summarized in the following tables:—

TABLE I.

Statement No. XIII gives the particulars regarding criminal lunatics. Of the average strength of 107.1, including 97.7 males and 9.4 females, 44.8 males and 6.2 females, or a total of 51, were employed. 22 males and 3 females had been charged for theft, 41 males and 5 females with culpable homicide amount-

ing to murder, 5 males and 1 female with culpable homicide not amounting to murder, 2 males with attempt to commit suicide, 12 males and 1 female with causing grievous hurt, 7 males with house-breaking, 11 males with mischief and assault, and 18 males and 2 females with miscellaneous offences.

13. The official visitors were regular in attendance at all the asylums except at Colába, where, as in 1893, the 2nd Presidency Magistrate was unavoidably absent but no substitute was provided as required by Government Resolution No. 104, dated 12th January 1874 (General Department).

14. The Principal Medical Officer, Sind District, inspected the Cowasji Jehángir Asylum, Hyderabad, in September and found it in good order, and I inspected the Colába Lunatic Asylum on the 20th November, the Ratnágiri Asylum on the 10th December, the Dhárwár Asylum on the 21st December, the Poona Asylum on the 28th December 1894, and the Ahmedabad Asylum on the 1st February 1895. That I found them all in perfect condition I am unable to report, but they were in as good condition as the Superintendents could make them. As is well known, the Colába Asylum has for a long time been unsuited for its purpose, but it will soon, it is hoped, be provided with a new building and ground for agricultural purposes at Naupada near Thána, the foundation stone having been laid by His Excellency Lord Harris on the 11th February last.

The Poona Asylum requires the addition of a wing for criminal lunatics, the provision of ground for agricultural purposes and sheds for day rooms and for manufacturing purposes.

Some alterations in the arrangements of the Dhárwár Asylum are required and have been sanctioned to be carried out when money is available. For a considerable portion of the year water for gardening purposes is deficient or not available.

The asylums of Ratnágiri and Ahmedabad are in good order, but the latter requires the addition of a wing for criminal lunatics, which question and that of the Poona Asylum are, at present, under the consideration of Government.

15. I am glad to be able to report that the Superintendents of all the Asylums performed their duties very satisfactorily throughout the year.

I have the honour to be,

Sir,

Your most obedient Servant,

P. S. TURNBULL, M.D., Surg.-Major-Genl.,
Surgeon-General with the Government of Bombay.

[illegible][illegible][illegible]

Transferred from the original to the Civil List on expiry of their sentence. The capacity of the Hyderabad Asylum is, at 50 superficial feet per patient, —for males 150, for females 20. The maximum number of lunatics confined on any one night was 110 males, 11 females.

[illegible]

Lunatic Asylums.—

Report on the Lunatic Asylums in the
Bombay Presidency for the year 1894.

General Department.
No. 2714

Bombay Castle,
2nd July 1895.

Letter from the Surgeon General with the Government of Bombay, No. S.B.—380,
dated 11th April 1895—

Submitting the Annual Report on Lunatic Asylums in the Bombay Presidency for the
year 1894.

RESOLUTION.—The total population of the asylums in this Presidency
was 1,000 in the year 1894, as compared with 988 in the previous year, and there
was an increase also in the daily average population, which was 727·5 as
compared with 716·1.

2. There have for some years past been no great fluctuations in the popula-
tion of the Colába Asylum. The daily average strength in this asylum was
31·5 Europeans and 256·1 Natives in the year under review.

3. At the Ratnágiri Asylum, with accommodation for 73 males and 39
females, the population has been steadily increasing for some years past, and
the daily average was for males 72·7 and 23·9 for females. It thus appears
that the male wards were virtually always full, and it is observed that on
one occasion there were 76 males in the asylum. At Ahmedabad, too,
though the average, 105·3, has not varied much for some years, it was nearly
equal to the accommodation, and it appears that on one night this asylum was
quite full, there being 91 males and 17 females, as compared with accommodation
for 90 of the former and 18 of the latter.

4. At Poona there have been recently no great fluctuations. At Dhárwár
there is accommodation for 88 patients, though the maximum number confined
in one night was 40 and the daily average 38 only. In Hyderabad also there
is accommodation for many more patients than those confined, and it is
observed that there has been a falling off in the number confined during the
last two years.

5. Of 152 patients newly admitted to the Colába Asylum in the year
under review, a large portion (87) were, as might be expected, natives of Bombay
City or the Konkan : but 23, of whom 14 were Europeans, were received from
Bengal or Madras. In Ratnágiri, Poona and Ahmedabad, most of the patients
belonged to those districts, respectively, or others easily accessible therefrom.
But only 2 out of 7 admitted to the Dhárwár Asylum belonged to the Dhárwár
District, and only 5 out of 31 in the Hyderabad Asylum belonged to the
Hyderabad District. This last-mentioned asylum draws its patients from a
large area.

6. The comparisons instituted, at page 7 of the report, between daily
strength and expenditure, indicate that (omitting Colába, which is on a different
footing from the rest) though there is not much variation in the total cost of
keeping a lunatic, the expenditure under different heads, such as medicines,
contingencies, clothing and bedding, varies very considerably. Some attempt
should be made in future to explain these variations when they are noticeable.

7. The mortality from cholera at Poona was specially large in the year
under review, and there were no less than 8 deaths from epilepsy.

8. The attention of the Judicial Department should be drawn to paragraph 13 of the report.

9. There are many recognized unsatisfactory features in connection with the important asylum at Colába, but no sufficient remedy can be expected till it is removed to a more convenient situation. The matter has long engaged the attention of Government, and shortly after the close of the year under review His Excellency Lord Harris laid the foundation stone of a new asylum on a site at Nowpáda about 20 miles from Bombay, which had been specially selected by a committee of experts as suitable for the lunatics of the City of Bombay and the Konkan, who form a large portion of the insanes at present accommodated at Colába.

J. DE C. ATKINS,
Secretary to Government.

To

The Surgeon General with the Government of Bombay,	} With copies of the report.
The Sanitary Commissioner for the Government of Bombay,
